

Take  
on the

# City Nature Challenge

26–29 April  
**2024**

## What is the City Nature Challenge?

A global event that showcases the biodiversity within your city.

Join the **City Nature Challenge southern Africa 2024 umbrella project** to find your city amongst the 32 participating cities in the region. Become involved and participate in observing nature.

iNaturalist is an online social network of naturalists, citizen scientists and biologists, built on the concept of mapping and sharing observations of biodiversity across the globe. Everyone is invited to participate!

### Find wildlife

It can be any plant, animal or any other evidence of wildlife in your city.

### Photograph it

Take a photo of what you find. Be sure to note the location of the plant or critter.

### Share!

Share your observations through iNaturalist or your city's chosen platform.

## Taking part is easy

1. Download the iNaturalist app on your smartphone and sign up.
2. Switch off your data and switch on your location.
3. Take good photos of any living or dead organism, or evidence of organisms (plants, animals, fungi, seaweed, lichen, shells, tracks, scat, feathers, etc.) that you see in your garden, around your home, in your neighbourhood, park, beach, reserve, etc.
4. Upload your observations at the end of your outing when you have sufficient Wi-Fi or data coverage.
5. Check back to see what people say about your observations.
